AFOSR QUALITY INSPECTION

Our work, prior to the current AFOSR support, resulted in the following publications where scanning tunneling microscopy and atomic force microscopy have been used to investigate (a) forces and (b) surfaces.

a. Forces

1. Dror Sarid, Douglas Iams, Volker Weissnerger, and L. Stephen Bell, "Compact Scanning Force Microscope Using a Diode Laser," Opt. Lett. **28**, 335 (1988).

b. Surfaces

2. Dror Sarid, Brian P. McGinnis, and Tammy D. Henson, "Four-wave mixing and scanning tunneling microscopy of semiconductor clusters," SPIE **881**, 114 (1988).
3. Dror Sarid, Tammy D. Henson, L. Stephen Bell, and Claude J. Sandroff, "Scanning tunneling microscopy of semiconductor clusters," J. Vac. Sci. Technol. A **6**, 424 (1988).
4. Dror Sarid, Tammy D. Henson, Neal Armstrong, and L. Stephen Bell, "Probing of Basal Planes of MoS<sub>2</sub> by Scanning Tunneling Microscopy," Appl. Phys. Lett. **52**, 2252 (1988).

92-19950

00 40 080

5. Tammy D. Henson, Dror Sarid, and L. Stephen Bell, "Scanning Tunneling Microscopy of Layered-Structure Semiconductors," *J. Microscopy* **152**, 467 (1988).
6. Dror Sarid, "Holographic display of scanning tunneling microscopy images," *Optics News*, August, 11 (1988).

During the current granting period, we have expanded our work and published papers in (a) forces, (b) surfaces, and (c) biology. The titles of the papers explain in some detail the directions we chose to take in the broad range of areas associated with scanning tunneling microscopy and atomic force microscopy. The work reported here includes investigations done in air, liquids, and under ultra-high vacuum conditions, using Digital Instruments' Nanoscope-II (three systems), Nanoscope-III, and McAllister UHV STM head. The many names appearing in the publications attest to the strong collaboration with other groups. The support of the AFOSR has been a key factor in making our research possible, and we plan to continue this effort during the second granting period.

#### a. Surfaces

1. T. Iwabuchi, C. Chuang, G. Khitrova, M. E. Warren, A. Chavez-Pirson, H. M. Gibbs, D. Sarid, and M. Gallagher, "Fabrication of GaAs nanometer structures by dry etching," *SPIE 1284*, 142 (1990).
